T. BOARD OF EDUCATION

1. Resolution in Support of the Bloomfield Board of Education’s Opposition to the Application of the Bloomfield Conservatory Charter School

Joe Kavesh moved to approve the following resolution:

WHEREAS The Bloomfield Board of Education on March 31, 2017, received a copy of an application to establish a charter school in the Township of Bloomfield under the name The Bloomfield Conservatory Charter School intending to serve 240 students in grades 6-8; and

WHEREAS The Bloomfield Board of Education believes the Bloomfield Conservatory Charter School appears to be a resubmission of the failed 2016 Frank Sinatra Charter School of the Arts application; and

WHEREAS the failed 2016 Frank Sinatra Charter School of the Arts application was deemed by the New Jersey Department of Education to “not provide a compelling rationale” and “the arts program is not clearly explained”; and the “existing [founder] group does not demonstrate strong expertise in business, finance and facilities management”; and the current application is not substantially different from the 2016 application; and

WHEREAS the founders of The Bloomfield Conservatory Charter School appear to have submitted an identical application for the East Orange Conservatory Charter School; and

WHEREAS the Bloomfield Board of Education operates a successful public school system with eight elementary schools serving grades K-6, one middle school serving grades 7 and 8, one high school, an Early Childhood Center and an alternative high school; and

WHEREAS the Bloomfield Board of Education has resolved to oppose the application for the Bloomfield Conservatory Charter School and has set for the reasons and basis for that opposition with great detail;

WHEREAS the Bloomfield Public School District's fine arts, music and theater programming and technology and curriculum initiatives already meet the expressed mission of the proposed Bloomfield Conservatory Charter School; and

WHEREAS the establishment of a charter school in Bloomfield serving 240 students would result in the state-mandated diversion of funds from the Bloomfield Board of Education of approximately \$2,300,000 plus any required additional special services costs and transportation costs. Such payments would threaten the school district's educational offerings by requiring material reductions in teaching staff and programs; and

WHEREAS, the founders of the Bloomfield Conservatory Charter School have not demonstrated community demand and support for a charter school; and

WHEREAS the founders of the Bloomfield Conservatory Charter School have no demonstrated track record of successfully starting and sustaining a charter school; and

WHEREAS N.J.S.A. 18A:36A-4(c) provides that the local board of education shall review a charter school application and forward a recommendation to the Commissioner of the New Jersey Dept of Education within 60 days of receipt of the application and the Bloomfield Board of Education has opposed that application; and

WHEREAS for the reasons stated in the Bloomfield Board of Education resolution, and because the Montclair Board of Education opposes the approval of new charter schools or the expansion of existing charter schools without a comprehensive review of the charter school program by the New Jersey Department of Education and further opposed the approval of new charter schools or the expansion of existing charter schools without the provision of sufficient State funds to support charter schools;

NOW THEREFORE BE IT RESOLVED that the Montclair Board of Education formally supports the opposition of the Bloomfield Board of Education to the application for the establishment of The Bloomfield Conservatory Charter School.

NOW THEREFORE BE IT FURTHER RESOLVED that a copy of this resolution be sent to Kimberley Harrington, Acting Commissioner, New Jersey Department of Education, Essex County Interim Superintendent of Schools Joseph Zarra, Senator Nia H. Gill, Assemblywoman Sheila Oliver, Assemblyman Thomas Giblin, Senator Ronald L. Rice, Assemblyman Ralph R. Caputo, Assemblywoman Cleopatra G. Tucker, Montclair Mayor Robert Jackson and the members of the Montclair Township Council, Essex County Freeholder Brendan Gill and the Bloomfield Board of Education.

INTRODUCTION

Acquired Immune Deficiency Syndrome (AIDS) and Hepatitis B warrant serious concern for workers occupationally exposed to blood and certain other body fluids that contain blood-borne pathogens. It is estimated nationally that more than 5.6 million workers in health care and public safety occupations could be potentially exposed. In recognition of these potential hazards, the New Jersey Public Employees Occupational Safety and Health Act has adopted the Occupational Safety and Health Administration (OSHA) regulation [Blood-borne Pathogens Standard, Title 29 Code of Federal Regulations (CFR) Part 1910.1030] to help protect New Jersey Public workers from these health hazards.

The major intent of this regulation is to prevent the transmission of blood-borne diseases within potentially exposed workplace occupations. The standard is expected to reduce and prevent employee exposure to the Human Immunodeficiency Virus (HIV), Hepatitis B Virus (HBV) and other blood-borne diseases. The Occupational Safety and Health Administration (OSHA) estimates the standard could prevent more than 200 deaths and about 9,000 infections per year from HBV alone. The standard requires that the employees follow universal precautions, which means that all blood or other potentially infectious materials must be treated as being infectious for HIV and HBV. Each employer must determine the application of universal precautions by performing an employee exposure evaluation. If employee exposure is recognized, as defined by the standard, then the standard mandates a number of requirements. One of the major requirements is the development of an Exposure Control Plan, which mandates engineering controls, work practices, personal protective equipment, HBV vaccinations and training. The standard also mandates practices and procedures for housekeeping, medical evaluations, hazard communication, and record keeping.

BOARD OF EDUCATION POLICY

The Montclair Public School District is committed to provide a safe and healthy work environment for our entire staff at every school. In pursuit of this endeavor, the following Exposure Control Plan (ECP) is provided to eliminate or minimize occupational exposure to blood-borne pathogens in accordance with OSHA Blood-borne Pathogens Standard, Title 29 Code of Federal Regulations 1910.1030, which has been adopted by NJ Public Employee-OSHA and Montclair BOE Policy #7420.1 Blood-borne Pathogen Exposure Control Plan.

The ECP is a key document to assist our Education Facility in implementing and ensuring compliance with the standard, thereby protecting our employees. This ECP includes:

- Employee exposure determination
- Implementation of various methods of exposure control, including:

- Universal Precautions

- Engineering and work practice controls

- Personal protective equipment

- Housekeeping

- Hepatitis B Vaccination

- Post-exposure evaluation and follow-up

- Training and communication of hazards to employees

- Record keeping

- Procedures for evaluating circumstances surrounding an exposure incident

Employees from all schools, central offices, maintenance operations and transportation facilities will follow the prescribed guidelines as stated in this ECP.

PROGRAM ADMINISTRATION

The Superintendent or designee is responsible for the implementation of the Exposure Control Plan (ECP). The Human Resources Officer and Supervisor of Nursing, with possible assistance from an outside consultant, will maintain and update the written ECP at least annually and whenever necessary to include new or modified tasks and procedures.

Those employees who are reasonably anticipated to have contact with or exposure to blood or other potentially infected materials are required to comply with the procedures and work practices outlined in this ECP.

The Director of Buildings and Grounds will have the responsibility for written housekeeping protocols and will ensure that effective disinfectants are purchased.

The Supervisor of Nursing and each school nurse will be responsible for ensuring that all medical actions required are preformed and that appropriate medical records are maintained.

The Human Resources Officer and Supervisor of Nursing will be responsible for training, documentation of training, and making the written ECP available to employees, OSHA and NIOSH representatives.

School Nurses at each individual school will maintain and provide all necessary personal protective equipment (PPE), engineering controls (i.e., sharp containers, etc.), and labels and red biohazard bags, as may be required by the standard. School nurses will provide all classroom teachers at the start of each school year with a baggie of supplies to prevent potential blood-borne pathogen exposure to include gloves and other first aid supplies as deemed necessary by the nurse.

The Supervisor of Nursing and Director of Buildings and Grounds will ensure that adequate quantities of the aforementioned equipment and supplies are available.

DEFINITIONS

Before beginning a discussion of the standard there are several definitions that should be explained which specifically apply to this regulation. These definitions are also included in paragraph (b) of the standard.

- A. **Blood** - human blood, human blood components, and products made from human blood.
- B. **Blood-borne Pathogens** - pathogenic micro-organisms that are present in human blood and can infect and cause disease in humans. These pathogens include, but are not limited to, Hepatitis B virus (HBV), and Human Immunodeficiency Virus (HIV).
- C. **Contaminated** - the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an item or surface.
- D. **Exposure Incident** - a specific eye, mouth, other mucous membrane, non-intact skin, or parenteral contact with blood or other potentially infectious materials that results from the performance of an employee's duties.
- E. **Occupational Exposure** - reasonably anticipated skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of an employee's duties.

F. Other Potentially Infectious Materials (OPIM)

1. The following human body fluids:
 - a. Semen
 - b. Vaginal secretions
 - c. Cerebrospinal fluid
 - d. Synovial fluid
 - e. Pleural fluid
 - f. Pericardial fluid
 - g. Peritoneal fluid
 - h. Amniotic fluid
 - i. Saliva in dental procedures
 - j. Any body fluid visibly contaminated with blood
 - k. All body fluids in situations where it is difficult or impossible to differentiate between body fluids.

H. Universal Precautions

An approach to infection control whereby all human blood man body fluids are treated as if known to be infectious for HIV, HBV, and other blood-borne pathogens.

Effective Dates

The Blood-borne Pathogens Standard was published in the New Jersey Register on July 6, 1993. The Standard, including Universal Precautions, became operative on October 4, 1993. The dates for completing the different parts of the Standard are:

Exposure Control Plan	December 3, 1993
Record-keeping	January 6, 1994
Information and Training	January 6, 1994
Methods of Compliance (except universal precautions)	February 6, 1994

Hepatitis B Vaccination and Post- Exposure Evaluation and Follow-up	February 6, 1994
Labels and Signs	February 6, 1994

The entire Standard has been adopted by the New Jersey Public Employee OSHA Program.

PEOSH Rev. Blood-borne Pathogens Standard September 4, 2001

The methods of implementation of these elements of the Standard are discussed in the subsequent pages of this Exposure Control Plan.

Employee exposure determination

- A. As Part of the exposure determination section of our ECP, the following is a list of all job classifications at our establishment in which **all** employees have occupational exposure:

<u>Job Classification</u>	<u>Department</u>
Nurses	Office of Nursing Services
Physician (1 for the District)	Office of Nursing Services
P.E. Teachers	Physical Education
Trainers	Athletics
Custodians	Maintenance
Speech Therapists	Pupil Services

- B. The following is a list of job classifications in which some employees at our establishment have occupational exposure. Included is a list of tasks and procedures in which occupational exposure may occur for these individuals.

<u>Job Classification</u>	<u>Department</u>	<u>Task/Procedure</u>
Swimming	High School Athletic Department (For pool supervision)	Required-First-Aid Certification Assisting injured/bleeding students
Special Education Teachers and Aides	Special Services/ All district schools/ Transportation	Feeding, toileting cleaning students, handling students, medical equipment and soiled clothing
Security Guards	School-wide	Fights

- C. Substitutes who fall within the above job classifications will be covered by the policy after ten (10) days of employment. These 10 days need not be consecutive.

All exposure determinations for employees in categories A and B were made without regard to the use of Personal Protective Equipment (PPE).

"Good Samaritan" acts which result in exposure to blood or other potentially infectious materials from assisting a fellow employee (i.e., assisting a co-worker with nosebleed, giving CPR or first aid) are not included in the Blood-borne Pathogen Standard. OSHA, however, encourages employers to offer Post-Exposure Evaluation and Follow-up in such cases.

METHODS OF IMPLEMENTATION AND CONTROL

Universal Precautions

All Montclair Public Schools employees will utilize Universal Precautions. Universal Precautions is an infection control method which requires employees to assume that all human blood and specified human body fluids (see Appendix A) are infectious for HIV, HBV and other blood-borne pathogens and must be treated accordingly.

Employees covered by the Blood-borne Pathogen Standard will receive an explanation of this ECP during their initial training and reviewed annually. All employees will have an opportunity to review this Plan at any time during their work shifts by contacting Principals, Supervisor of Nursing or

Human Resources Officer. Employees seeking copies of the Plan may contact the Principal. A copy of the Plan will be made available free of charge and within fifteen (15) days of the request.

The Human Resources Officer and Supervisor of Nursing will also be responsible for reviewing and updating the ECP annually or sooner, if necessary to reflect any new or modified tasks and procedures which affect occupational exposure and to reflect new or revised employee positions with occupational exposure. A consultant may be hired to help update the ECP.

Engineering Controls and Work Practices

Engineering and work practice controls will be used to prevent or minimize exposure to blood-borne pathogens. The specific engineering and work practice controls are as follows:

Engineering Controls

- Where necessary, Bio-Hazard labels and/or red bags deemed will be made available at the office of the school nurse, Director of Building and Grounds, the school custodial office, office of the Transportation Manager and the Athletic Director for contaminated equipment and material disposal.
- Puncture resistant containers for contaminated needles are available in each School Nurse's office.

New technology for needles and sharps will be evaluated and implemented whenever possible to further prevent accidental needle sticks and cuts. Our engineering controls (i.e., sharps containers, etc.) will be inspected and maintained or replaced by each Nurse in every school year or as needed (i.e., when containers are full).

Work Practice Controls

- Wear gloves when handling blood or OPIM. Use powderless hypoallergenic gloves only; no latex gloves. Double-gloving may be employed at the discretion of the user.
- Gloves are available in the office of the School Nurse, Director of Buildings and Grounds, Athletic Director and the Transportation Manager to all staff for handling or exposure to blood or other potentially infectious materials (OPIM). A supply will be provided to the staff annually or as the supply diminishes.

- Wash hands immediately or as soon as possible with soap and running water after gloves or other protective equipment are removed. Hand sanitizer may be used until soap and water is available.
- Wash hands (and other affected body parts) immediately, or as soon as possible, following skin contact with blood or OPIM.
- Washing facilities, equipped with soap, paper towels or electrical dryers are located in maintenance areas, nurse's office and lavatories of all schools.

Using appropriate (puncture-resistant, leak-proof, labeled, closable) container for needle disposal is required.

- Recapping, bending or breaking of needles is prohibited.

Eating, drinking, smoking, applying cosmetics, lip balm and handling contact lenses are prohibited in work areas where there is a likelihood of occupational exposure to blood or OPIM.

- Food and drinks are prohibited in areas such as refrigerators, counters, or cabinets where blood or OPIM are present.
- Using leak-proof containers for collecting, handling, processing and storing, carrying or shipping blood or OPIM is required.
- Warning labels are required to be affixed to containers used for storing, carrying or shipping regulated biohazardous wastes. Red bio-hazard bags may serve this purpose.

STANDARD OPERATING PROCEDURES FOR HANDLING SYRINGES, NEEDLES, AND OTHER SHARPS

This procedure outlines methods for safe handling and disposal of all discarded syringes, needles, or other sharps used or handled by Montclair Public School District staff, including nurses and other medical department personnel, maintenance, janitorial and custodial workers and cleaners. The purpose of this SOP is to describe methods to prevent injury and possible blood-borne pathogen infections from sharps.

It is the responsibility of all affected employees to contribute to and comply with these procedures. Likewise, it is the responsibility of the Supervisor of Nursing to order and maintain a sufficient number of properly labeled sharps containers in the nurse's office in each school of the Montclair Public School District.

1. **Never dispose of sharps in the regular trash. All needles, syringes, broken glass, disposable instruments, etc., which have come in contact with blood or other bodily fluids will be disposed of at the point of use in rigid, leak proof sharps containers, labeled as biohazard waste with the biohazard symbol.** Should the sharps be discovered outside of the school nurses office, they should be transported in a dustpan to the nurse's office.
 2. Always wear gloves and other appropriate personal protective equipment when performing procedures using needles and syringes.
 3. Upon completion of a procedure involving use of a syringe and needle, discard entire needle and syringe system into a sharps container.
 4. Needles should never be recapped, bent, broken, removed, or otherwise manipulated by hand.
 5. Sharp's containers will be checked and changed on an as needed basis or whenever the container is about three-quarters full. Employees must wear gloves, seal the container, and place sharps in the designated area for collection and disposal. A contracted waste disposal service will transport the waste from the container to a local area hospital.
 6. If a needle stick should occur, wash area thoroughly with antiseptic soap and water, report incident immediately to:
 - 6.1. Within schoolSchool Nurse
 - 6.2. Off Site.....Supervisor and/or
 - 6.3. Athletic.....Athletic Director
- Seek prompt medical attention and fill out an accident report as soon as possible.
7. Hypodermic syringes and needles must be stored in a secure place and only used by authorized personnel (nurses).
 8. DO NOT place a needle cap in your mouth in order to remove the needle.
 9. Never recap needles.
 10. DO NOT leave sharps unattended.
 11. Immediately dispose of a used hypodermic syringe and needle, as a unit, directly into a sharps container, without any further manipulation.
 12. Never bend, break, shear, recap or remove needles from syringes or otherwise manipulate by hand prior to disposal.

13. Never force a sharps item into a container, or retrieve an item once it has been discarded
14. Never handle any broken, contaminated bottles, vials, syringes or glassware directly by hand, even if wearing gloves. Use tongs, forceps or other devices, two pieces of cardboard or a brush or broom and a dustpan.
15. Whenever possible, students should dispose of their own sharps under the supervision of the nurse.

Personal Protective Equipment (PPE)

Personal protective equipment must also be used if occupational exposure remains after instituting engineering and work practice controls, or if controls are not feasible. Training will be provided by either the Supervisor of Nursing, or the Director of Buildings and Grounds, in the use of the appropriate PPE for employee's specific job classifications and tasks/procedures they will perform.

Additional training will be provided, whenever necessary, if an employee takes a new position or if new duties are added to their current position.

Appropriate PPE is required for the following tasks; the specific equipment to be used is listed after the task:

<u>Task</u>	<u>Equipment</u>
Procedures involving needles	Use gloves
Procedures involving profuse bleeding, cleaning lacerations or projectile vomiting	Use gloves, face shields
Providing emergency CPR	Use mouth shields
Cleaning contaminated areas	Use gloves
Decontamination of equipment	Use gloves
First Aid where blood or OPIM are present in small amounts	Use gloves
Blood or OPIM in large amounts or spurting or splashing	Use gloves, gowns, eye protection and masks

As a general rule, all employees using PPE must observe the following precautions:

- Wash hands immediately or as soon as feasible after removal of gloves or other personal protective equipment.
- Remove protective equipment before leaving the work area and after a garment becomes contaminated.
- Place used protective equipment in appropriately designated areas or containers for storage, washing, decontamination, or disposal.
- Medical waste containers are located in the Nurses Office at each school. These containers are to be used for sharps or any items that are saturated with blood.
- Wear appropriate gloves when contact with blood or other potentially infectious materials is reasonably anticipated and when handling or touching contaminated items or surfaces. Replace gloves, if torn, punctured, contaminated, or if their ability to function as a barrier is compromised.
- Wash hands and other exposed skin with soap and warm water, as soon as possible following any contact of body areas with blood or OPIM. Also, flush exposed mucous membranes (eyes, nose or mouth) with water for at least 15 minutes.
- Utility gloves are to be discarded when they show signs of cracking, peeling, tearing, puncturing, or other deterioration. While utility gloves may be decontaminated for reuse, if their integrity is not compromised, this practice is not conducted in The Montclair Public Schools.
- Wear appropriate gloves when it can be reasonably anticipated that you may have contact with blood or other potentially infectious materials and when handling or touching contaminated items or surfaces. Replace gloves, if torn, punctured, contaminated, or if their ability to function as a barrier is compromised.
- Repair or replacement of PPE will be at no cost to employees.
- Never wash or decontaminate disposable gloves for reuse or before disposal.
- If a garment is penetrated by blood or OPIM, the garment must be removed immediately or as soon as possible.

Appropriate containers for disposal of gloves and mouth shields can be found in each School Nurse's office and Custodian's office and work areas.

Training

All employees who have or are reasonably anticipated to have occupational exposure to blood-borne pathogens will receive initial training online with supplemental training by consultant or school nurse. Initial and update training will be conducted online at www.gcctraining.com.

The OSHA pamphlet “Occupational Exposure to Blood-borne Pathogens” and Fact Sheets may be used as additional training materials to inform employees of the epidemiology, symptoms, and transmission of blood-borne diseases. In addition, the training program will cover, at a minimum, the following elements:

- A copy and explanation of the Standard;
- Epidemiology and symptoms of blood-borne pathogens;
- Modes of transmission;
- The Montclair Public Schools Exposure Control Plan and how to obtain a copy;
- Methods to recognize exposure tasks and other activities that may involve exposure to blood or OPIM;
- Use and limitations of engineering controls, work practices and PPE;
- PPE types, use, location, removal, handling, decontamination, and disposal;
- The basis for selection of PPE;
- Hepatitis B vaccine; offered free of charge. Explanation and fact sheet will be given prior to vaccination on its safety, effectiveness, benefits, and methods of administration;
- Emergency procedures - for blood and OPIM;
- Exposure incident procedures;
- Post-exposure evaluation and follow-up;
- Signs and labels and/or color coding;
- Opportunity for Questions and Answers

An employee education and training record will be completed for each employee upon being trained. This document will be kept with the employee's records in the Personnel Department a minimum of three years.

Hepatitis B Vaccination

The Supervisor of Nursing and each School Nurse will provide information on Hepatitis B vaccinations addressing its safety, benefits, efficacy methods of administration and availability.

The Hepatitis B vaccination series will be made available in the nursing office of each School by the School Nurse at no cost within ten (10) days of initial assignment to employees who have occupational exposure to blood or other potentially infectious materials, unless:

- The employee has previously received the series;
- Antibody testing reveals that the employee is immune;

- Medical reasons prevent taking the vaccination, or;
- The employee chooses not to participate.

The Supervisor of Nursing/School Nurse will maintain a supply of the Hepatitis B vaccine and will administer the said vaccine to applicable employees and maintain records of same. All employees are strongly encouraged to receive the Hepatitis B vaccination series. However, if an employee declines Hepatitis B vaccination, the employee must sign a statement to this effect.

Employees who decline may request and obtain the vaccination at a later date at no cost. Documentation of refusal of the Hepatitis B vaccination (see Appendix C) will be kept in the Office of Nursing Services. Appendix B is an optional form that may be used to record the employee vaccination series information.

Other requirements include:

- Participation in pre-screening is not a prerequisite for receiving the Hepatitis B vaccination.
- Hepatitis B vaccination will be provided even if the employee declines but later accepts treatment.
- Employees must sign a statement when declining the HBV vaccination.
- Vaccination is to be administered according to the United States Public Health Service (US PHS) recommended protocol;
- Hepatitis B vaccination booster doses must be available to employees if recommended by US PHS, a federal health agency.
- This ECP incorporates The Center for Disease Control and Prevention's (CDC's) recommendation on testing new Health Care Workers (*) for antibodies to hepatitis B surface antigen one (1) to two (2) months after completion of the three (3) dose hepatitis B vaccination series. (*) Health Care Workers at the MPS shall include the School Nurses.

Post-Exposure Evaluation Procedures

Should an exposure incident occur, contact the School Nurse immediately. Each exposure must be documented by the employee on an "Exposure Incident Report" form" (see Appendix D). The School Nurse will add any additional information as needed.

An immediately available confidential medical evaluation and follow-up will be conducted by the School Physician, or any qualified physician paid by The Montclair Public Schools.

The following elements will be performed:

- Document the routes of exposure and how exposure occurred.
- Identify and document the source individual (see Appendix E), unless the employer can establish the identification is infeasible or prohibited by state or local law (see Note # 1).

- Obtain consent (see Note # 2) and test source individual's blood as soon as possible to determine HIV and HBV infectivity and document the source's blood test results.
- If the source individual is known to be infected with either HIV or HBV, testing need not be repeated to determine the known infectivity.
- Provide the exposed employee with the source individual's test results (where source individual has consented) and information about applicable disclosure laws and regulations concerning the source identity and infectious status.
- After obtaining consent, collect exposed employee's blood as soon as feasible after the exposure incident and test blood for HBV and HIV serological status.
- If the employee does not give consent for HIV serological testing during the collection of blood for baseline testing, preserve the baseline blood sample for at least 90 days (see Note # 3).

Appendix D "Exposure Incident Report" and Appendix E "Request for Source Individual Evaluation" and Appendix F "Employee Exposure Follow-Up Record" (see Note # 4) will be provided to the employee so they may bring them along with any additional relevant medical information to the medical evaluation. Original copies of forms will be maintained with employee's medical records.

The Superintendent, Personnel Administrator and Supervisor of Nursing will review the circumstances of the exposure incident to determine if procedures; protocols and/or training need to be revised.

NOTES TO EMPLOYER:

Note # 1:

New Jersey Law (NJSA 26-5C *et seq.*) and regulation (NJAC 8:57-2) requires information about AIDS and HIV to be kept confidential. While the law requires reporting of positive HIV results to the State Health Department, the law strictly limits disclosure of HIV-related information.

When disclosure of HIV-related information is authorized by a signed release, the person who has been given the information **MUST** keep it confidential. Re-disclosure may occur **ONLY** with another authorized signed release.

Note # 2:

If, during this time, the exposed employee elects to have the baseline sample tested, testing shall be done as soon as feasible.

Note # 3:

Appendixes D, E and F are optional forms which have been prepared to assist employers with gathering information that is required by the Standard. If an employer chooses not to use these forms, this information must still be provided and recorded in accordance with the Standard. Also note that HIV Confidential Case Report form and/or the AIDS Adult Confidential Case Report form, as well as the HIV Testing Policy information applicable to New Jersey public sector employers can be obtained by

contacting:

New Jersey State Department of Health and Senior Services
Data Analysis Unit
P.O. Box 363
Trenton, New Jersey 08625-0363
(609) 984-6204

Note # 4:

Following an exposure incident, prompt medical evaluation and prophylaxis is imperative. Timeliness is, therefore, an important factor in effective medical treatment.

Highlights of post exposure evaluation and follow-up requirements are as follows:

- Documentation of exposure routes and how exposure incident occurred;
- Identification and documentation of source individual's infectivity, if possible;
- Collection and testing of employee's blood for HBV and HIV serological status (employee's consent required);
- Post-exposure prophylaxis when medically indicated;
- Evaluation of reported illnesses.

Health Care Professionals

The School Nurse will ensure that the health care professionals, who are responsible for employee's Hepatitis B vaccination, post-exposure evaluation and follow-up, be given a copy of the OSHA Blood-borne Pathogen Standard. The OSHA Blood-borne Pathogen Standard can be located in Appendix J. The School Nurse or School Physician will ensure that the health care professional evaluating an employee after an exposure incident receives the following:

- Description of the employee's job duties relevant to the exposure incident;
- Route(s) of exposure;
- circumstances of exposure;
- If possible, results of the source individual's blood test; and
- Relevant employee medical records, including vaccination status.

Healthcare Professional's Written Opinion

The evaluating health care professional will provide the employee with a copy of the written opinion within fifteen (15) days after the completion of the evaluation.

For Hepatitis B vaccinations, the health care professional's written opinion will be limited to whether the

employee requires or has received the Hepatitis B vaccination.

The written opinion for post-exposure evaluation and follow-up will be limited to whether or not the employee has been informed of the results of the medical evaluation and any medical conditions which may require further evaluation and treatment.

All other diagnoses must remain confidential and not be included in the written report to The Montclair Public Schools.

Housekeeping

The Montclair Public Schools Director of Buildings and Grounds has developed and implemented a written schedule for cleaning and decontaminating work surfaces as indicated by the Standard.

- Never manually open, empty, or clean reusable contaminated sharps disposal containers (see New Jersey Department of Environmental Protection Regulations).
- Discard all regulated waste according to federal, state and local regulations, i.e., liquid or semi-liquid blood or other potentially infectious material; items contaminated with blood or other potentially infectious materials that would release these substances in a liquid or semi-liquid state if compressed; items caked with dried blood or other potentially infectious materials and capable of releasing these materials during handling; contaminated sharps; and pathological and microbiological wastes containing blood or other potentially infectious materials.

Labeling

The following labeling method(s) will be used at our facilities:

- All sharps disposal containers used in each school nurse's office will have an orange-red "BIOHAZARD" label affixed to it.
- Red bio-hazard bags will be used for disposal of potentially infectious materials (see "Housekeeping," above).

The School Nurse will ensure warning labels are affixed to the sharps container. The nurses are to notify the Supervisor of Nursing if they discover unlabeled regulated waste containers.

RECORDKEEPING

Medical Records

Medical records are maintained for each employee with occupational exposure in accordance with 29 CFR 1910.1020, OSHA's Access to Medical Records Rule.

All employee medical records will be kept confidential and will not be disclosed or reported without the employee's express written consent to any person within or outside the workplace except as required by the Standard or as may be required by law.

Employee medical records shall be maintained for at least the duration of employment, plus thirty (30)

years in accordance with 29 CFR 1910.1020.

Employee medical records shall be provided upon request of the employee or to anyone having written consent of the employee within fifteen (15) working days.

The Supervisor of Nursing is responsible for maintenance of the required medical records which will be kept in the Office of the Nursing Services. In addition to the requirements of 29 CFR 1910.1020, the medical records will include:

- Name and Social Security Number of employee;
- A copy of the employee's Hepatitis B vaccinations and any medical records relative to the employee's ability to receive vaccination;
- A copy of all results of examinations, medical testing, and follow-up procedures as required by the Standard;
- A copy of all healthcare professional's written option(s) as required by the Standard.
- Training records will not be co-mingled with medical records.

Cleaning & Decontamination

The cleaning schedule for the Buildings & Grounds Department is as follows:

Area	Scheduled Cleaning (Day/Time)	Cleaners and Disinfectants Used	Specific Instructions
Bathrooms	Daily or as needed	H ₂ O Orange 2	As recommended by Manufacturer
Nurse's Offices	Daily or more often, as may be needed	H ₂ O Orange 2	As recommended by Manufacturer
Hallways and Stairs	Daily or more often, as may be needed	H ₂ O Orange 2	As recommended by Manufacturer
Other areas to be specified	Daily or more often, as may be needed	H ₂ O Orange 2	As recommended by Manufacturer

The following procedures are to be followed for decontamination and to prevent exposure to potentially infectious materials:

- Decontaminate work surfaces with an appropriate U.S. Environmental Protection Agency (USEPA) approved disinfectant, e.g., Lysol brand disinfectant, or freshly prepared 10% bleach solution (1 part commercial bleach solution, like Clorox brand bleach to 9 parts of water) after completion of procedures, immediately when overtly contaminated, or after any spill of blood or other potentially infectious materials. A "Pick-Up Kit" for cleaning up bodily fluids can be found in each custodian's office.
- At the end of the work shift decontaminate when surfaces have become contaminated since

last cleaning.

- Remove and replace protective coverings such as plastic wrap and aluminum foil when contaminated.
- Inspect and decontaminate, on a regular basis, reusable receptacles such as bins, pails, and cans that have likelihood for becoming contaminated. When contamination is visible on or in receptacles, clean and decontaminate them immediately, or as soon as feasible.
- Always use mechanical means such as tongs, forceps, or a brush and a dust pan to pick up contaminated broken glassware, never pick up with hands even if gloves are worn.
- Replace plastic waste basket containers daily.
- Place regulated waste in closable and labeled or color-coded containers. When storing, handling, transporting or shipping, place other regulated waste in containers that are constructed to prevent leakage.
- When discarding contaminated sharps, place them in containers that are closable, puncture-resistant, appropriately labeled or color-coded, and leak-proof on the sides and bottom.
- Ensure that sharps containers are easily accessible to personnel and located as close as feasible to the immediate area where sharps are used or can be reasonably anticipated to be found. Sharps containers also must be kept upright throughout use, replaced routinely, closed when moved, and not allowed to be overfilled.

Training Records

Blood-borne pathogen training records will be maintained by the Personnel Department. The training record shall include:

- Dates of the training session;
- Contents or a summary of the training sessions;
- The names and qualifications of persons conducting the training;
- The names and job titles of all persons attending the training sessions.

Training records will be maintained for the minimum of three (3) years from the date on which the training occurred.

Employee training records will be provided upon request to the employee or the employee's authorized representative within fifteen (15) working days.

Training records will not be co-mingled with medicals records.

Transfer of Records

If The Montclair Public Schools ceases to do business and there is not a successive employer to receive

and retain the records for the prescribed period, the employee shall notify the director of the National Institute of Occupational Safety and Health (NIOSH) at least three (3) months prior to scheduled record disposal and prepare to transmit them to the director, if so requested.

First Aid Responders

This section only applies to employees who are designated to render first aid assistance, but this assistance is not their primary work assignment. First aid providers who are in this collateral duty category are listed below for easy reference and also in Section B of the Employer Exposure Determination.

Designated First Aid Providers:

- High School Athletic Trainer (as required for supervision of the pool area).
- High School Swimming Coaches.
- Security

These employees will be offered pre-exposure vaccinations.

In the event of a first aid incident where blood or OPIM are present, the Trainer, Coach or other employee(s) providing the first aid assistance is (are) instructed to generate a report and submit it to the School Nurse before the end of the next working day.

The Nursing Supervisor will maintain all reports (Appendix D can be used) which describes name of the first aider, date, time and description of incident.

The School Nurse will ensure that any first aider that desires the vaccine series after an incident involving blood or OPIM will receive it as soon as possible, but not later than twenty-four (24) hours after the incident.

The School Nurse, or his/her designee, will train first aid providers on the specifics of the reporting procedures, in addition to all the training required in the training section of this policy.

Request for Source Individual Evaluation

Dear (Emergency Room Medical Director, Infection Control Practitioner):

During a recent transport of a patient to your facility, one of our school employees was involved in an event which may have resulted in exposure to a Blood-borne Pathogen.

I am asking you to perform an evaluation of the source individual who was transported to your facility. Given the circumstances surrounding this event, please determine whether our pre-hospital care worker is at risk for infection and/or requires medical follow-up.

Attached is a "Documentation and Identification of Source Individual" form which was initiated by the exposed worker. Please complete the source individual section and communicate the findings to the designated medical provider.

The evaluation form has been developed to provide confidentiality assurances for the patient and the exposed worker concerning the nature of the exposure. Any communication regarding the findings is to be handled at the medical provider level.

We understand that information relative to human immunodeficiency virus (HIV) and AIDS has specific protections under the law and cannot be disclosed or released without the written consent of the patient. It is further understood that disclosure obligates persons who receive such information to hold it confidential.

Thank you for your assistance in this very important matter.

Sincerely,

1910.1030(a)

Scope and Application. This section applies to all occupational exposure to blood or other potentially infectious materials as defined by paragraph (b) of this section.

1910.1030(b)

Definitions. For purposes of this section, the following shall apply:

Assistant Secretary means the Assistant Secretary of Labor for Occupational Safety and Health, or designated representative.

Blood means human blood, human blood components, and products made from human blood.

Blood-borne Pathogens means pathogenic microorganisms that are present in human blood and can cause disease in humans. These pathogens include, but are not limited to, hepatitis B virus (HBV) and human immunodeficiency virus (HIV).

Clinical Laboratory means a workplace where diagnostic or other screening procedures are performed on blood or other potentially infectious materials.

Contaminated means the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an item or surface.

Contaminated Laundry means laundry which has been soiled with blood or other potentially infectious materials or may contain sharps.

Contaminated Sharps means any contaminated object that can penetrate the skin including, but not limited to, needles, scalpels, broken glass, broken capillary tubes, and exposed ends of dental wires.

Decontamination means the use of physical or chemical means to remove, inactivate, or destroy blood-borne pathogens on a surface or item to the point where they are no longer capable of transmitting infectious particles and the surface or item is rendered safe for handling, use, or disposal.

Director means the Director of the National Institute for Occupational Safety and Health, U.S. Department of Health and Human Services, or designated representative.

Engineering Controls means controls (e.g., sharps disposal containers, self-sheathing needles, safer medical devices, such as sharps with engineered sharps injury protections and needleless systems) that isolate or remove the blood-borne pathogens hazard from the workplace.

Exposure Incident means a specific eye, mouth, other mucous membrane, non-intact skin, or parenteral contact with blood or other potentially infectious materials that results from the performance of an employee's duties.

Hand washing Facilities means a facility providing an adequate supply of running potable water, soap and single use towels or hot air drying machines.

Licensed Healthcare Professional is a person whose legally permitted scope of practice allows him or her to independently perform the activities required by paragraph (f) Hepatitis B Vaccination and Post-exposure Evaluation and Follow-up.

HBV means hepatitis B virus.

HIV means human immunodeficiency virus.

Needleless systems means a device that does not use needles for:

- (1) The collection of bodily fluids or withdrawal of body fluids after initial venous or arterial access is established;
- (2) The administration of medication or fluids; or
- (3) Any other procedure involving the potential for occupational exposure to blood-borne pathogens due to percutaneous injuries from contaminated sharps.

Occupational Exposure means reasonably anticipated skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of an employee's duties.

Other Potentially Infectious Materials means (1) The following human body fluids: semen, vaginal secretions, cerebrospinal fluid, synovial fluid, pleural fluid, pericardial fluid, peritoneal fluid, amniotic fluid, saliva in dental procedures, any body fluid that is visibly contaminated with blood, and all body fluids in situations where it is

difficult or impossible to differentiate between body fluids; (2) Any unfixed tissue or organ (other than intact skin) from a human (living or dead); and (3) HIV-containing cell or tissue cultures, organ cultures, and HIV- or HBV-containing culture medium or other solutions; and blood, organs, or other tissues from experimental animals infected with HIV or HBV.

Parenteral means piercing mucous membranes or the skin barrier through such events as needlesticks, human bites, cuts, and abrasions.

Personal Protective Equipment is specialized clothing or equipment worn by an employee for protection against a hazard. General work clothes (e.g., uniforms, pants, shirts or blouses) not intended to function as protection against a hazard are not considered to be personal protective equipment.

Production Facility means a facility engaged in industrial-scale, large-volume or high concentration production of HIV or HBV.

Regulated Waste means liquid or semi-liquid blood or other potentially infectious materials; contaminated items that would release blood or other potentially infectious materials in a liquid or semi-liquid state if compressed; items that are caked with dried blood or other potentially infectious materials and are capable of releasing these materials during handling; contaminated sharps; and pathological and microbiological wastes containing blood or other potentially infectious materials.

Research Laboratory means a laboratory producing or using research-laboratory-scale amounts of HIV or HBV. Research laboratories may produce high concentrations of HIV or HBV but not in the volume found in production facilities.

Sharps with engineered sharps injury protections means a nonneedle sharp or a needle device used for withdrawing body fluids, accessing a vein or artery, or administering medications or other fluids, with a built-in safety feature or mechanism that effectively reduces the risk of an exposure incident.

Source Individual means any individual, living or dead, whose blood or other potentially infectious materials may be a source of occupational exposure to the employee. Examples include, but are not limited to, hospital and clinic patients; clients in institutions for the developmentally disabled; trauma victims; clients of drug and alcohol treatment facilities; residents of hospices and nursing homes; human remains; and individuals who donate or sell blood or blood components.

Sterilize means the use of a physical or chemical procedure to destroy all microbial life including highly resistant bacterial endospores.

Universal Precautions is an approach to infection control. According to the concept of Universal Precautions, all human blood and certain human body fluids are treated as if known to be infectious for HIV, HBV, and other blood-borne pathogens.

Work Practice Controls means controls that reduce the likelihood of exposure by altering the manner in which a task is performed (e.g., prohibiting recapping of needles by a two-handed technique).

1910.1030(c)

Exposure Control --

1910.1030(c)(1)

Exposure Control Plan.

1910.1030(c)(1)(i)

Each employer having an employee(s) with occupational exposure as defined by paragraph (b) of this section shall establish a written Exposure Control Plan designed to eliminate or minimize employee exposure.

1910.1030(c)(1)(ii)

The Exposure Control Plan shall contain at least the following elements:

1910.1030(c)(1)(v)

An employer, who is required to establish an Exposure Control Plan, shall solicit input from non-managerial employees responsible for direct patient care who are potentially exposed to injuries from contaminated sharps in the identification, evaluation, and selection of effective engineering and work practice controls and shall document the solicitation in the Exposure Control Plan.

1910.1030(c)(1)(vi)

The Exposure Control Plan shall be made available to the Assistant Secretary and the Director upon request for examination and copying.

1910.1030(c)(2)

Exposure Determination.

1910.1030(c)(2)(i)

Each employer who has an employee(s) with occupational exposure as defined by paragraph (b) of this section shall prepare an exposure determination. This exposure determination shall contain the following:

1910.1030(c)(2)(i)(B)

1910.1030(c)(2)(i)(B)

A list of job classifications in which some employees have occupational exposure, and

1910.1030(c)(2)(i)(C)

A list of all tasks and procedures or groups of closely related task and procedures in which occupational exposure occurs and that are performed by employees in job classifications listed in accordance with the provisions of paragraph (c)(2)(i)(B) of this standard.

1910.1030(c)(2)(ii)

This exposure determination shall be made without regard to the use of personal protective equipment.

1910.1030(d)

Methods of Compliance --

1910.1030(d)(1)

General. Universal precautions shall be observed to prevent contact with blood or other potentially infectious materials. Under circumstances in which differentiation between body fluid types is difficult or impossible, all body fluids shall be considered potentially infectious materials.

1910.1030(d)(2)

Engineering and Work Practice Controls.

1910.1030(d)(2)(i)

Engineering and work practice controls shall be used to eliminate or minimize employee exposure. Where occupational exposure remains after institution of these controls, personal protective equipment shall also be used.

..1910.1030(d)(2)(ii)

1910.1030(d)(2)(ii)

Engineering controls shall be examined and maintained or replaced on a regular schedule to ensure their effectiveness.

1910.1030(d)(2)(iii)

Employers shall provide handwashing facilities which are readily accessible to employees.

1910.1030(d)(2)(iv)

When provision of handwashing facilities is not feasible, the employer shall provide either an appropriate antiseptic hand cleanser in conjunction with clean cloth/paper towels or antiseptic towelettes. When antiseptic hand cleansers or towelettes are used, hands shall be washed with soap and running water as soon as feasible.

1910.1030(d)(2)(v)

Employers shall ensure that employees wash their hands immediately or as soon as feasible after removal of gloves or other personal protective equipment.

1910.1030(d)(2)(vi)

Employers shall ensure that employees wash hands and any other skin with soap and water, or flush mucous membranes with water immediately or as soon as feasible following contact of such body areas with blood or other potentially infectious materials.

1910.1030(d)(2)(vii)

Contaminated needles and other contaminated sharps shall not be bent, recapped, or removed except as noted in paragraphs (d)(2)(vii)(A) and (d)(2)(vii)(B) below. Shearing or breaking of contaminated needles is prohibited.

..1910.1030(d)(2)(vii)(A)

1910.1030(d)(2)(vii)(A)

Contaminated needles and other contaminated sharps shall not be bent, recapped or removed unless the employer can demonstrate that no alternative is feasible or that such action is required by a specific medical or dental procedure.

1910.1030(d)(2)(vii)(B)

Such bending, recapping or needle removal must be accomplished through the use of a mechanical device or a one-handed technique.

1910.1030(d)(2)(viii)

Immediately or as soon as possible after use, contaminated reusable sharps shall be placed in appropriate containers until properly reprocessed. These containers shall be:

1910.1030(d)(2)(viii)(A)

In accordance with the requirements set forth in paragraph (d)(4)(ii)(E) for reusable sharps.

1910.1030(d)(2)(ix)

Eating, drinking, smoking, applying cosmetics or lip balm, and handling contact lenses are prohibited in work areas where there is a reasonable likelihood of occupational exposure.

1910.1030(d)(2)(x)

Food and drink shall not be kept in refrigerators, freezers, shelves, cabinets or on countertops or benchtops where blood or other potentially infectious materials are present.

..1910.1030(d)(2)(xi)

1910.1030(d)(2)(xi)

All procedures involving blood or other potentially infectious materials shall be performed in such a manner as to minimize splashing, spraying, spattering, and generation of droplets of these substances.

1910.1030(d)(2)(xii)

Mouth pipetting/suctioning of blood or other potentially infectious materials is prohibited.

1910.1030(d)(2)(xiii)

Specimens of blood or other potentially infectious materials shall be placed in a container which prevents leakage during collection, handling, processing, storage, transport, or shipping.

1910.1030(d)(2)(xiii)(A)

The container for storage, transport, or shipping shall be labeled or color-coded according to paragraph (g)(1)(i) and closed prior to being stored, transported, or shipped. When a facility utilizes Universal Precautions in the handling of all specimens, the labeling/color-coding of specimens is not necessary provided containers are recognizable as containing specimens. This exemption only applies while such specimens/containers remain within the facility. Labeling or color-coding in accordance with paragraph (g)(1)(i) is required when such specimens/containers leave the facility.

1910.1030(d)(2)(xiii)(B)

If outside contamination of the primary container occurs, the primary container shall be placed within a second container which prevents leakage during handling, processing, storage, transport, or shipping and is labeled or color-coded according to the requirements of this standard.

..1910.1030(d)(2)(xiii)(C)

1910.1030(d)(2)(xiii)(C)

If the specimen could puncture the primary container, the primary container shall be placed within a secondary container which is puncture-resistant in addition to the above characteristics.

1910.1030(d)(2)(xiv)

Equipment which may become contaminated with blood or other potentially infectious materials shall be examined prior to servicing or shipping and shall be decontaminated as necessary, unless the employer can demonstrate that decontamination of such equipment or portions of such equipment is not feasible.

1910.1030(d)(2)(xiv)(A)

A readily observable label in accordance with paragraph (g)(1)(i)(H) shall be attached to the equipment stating which portions remain contaminated.

1910.1030(d)(2)(xiv)(B)

The employer shall ensure that this information is conveyed to all affected employees, the servicing representative, and/or the manufacturer, as appropriate, prior to handling, servicing, or shipping so that appropriate precautions will be taken.

1910.1030(d)(3)

Personal Protective Equipment --

1910.1030(d)(3)(i)

Provision. When there is occupational exposure, the employer shall provide, at no cost to the employee, appropriate personal protective equipment such as, but not limited to, gloves, gowns, laboratory coats, face shields or masks and eye protection, and mouthpieces, resuscitation bags, pocket masks, or other ventilation devices. Personal protective equipment will be considered "appropriate" only if it does not permit blood or other potentially infectious materials to pass through to or reach the employee's work clothes, street clothes, undergarments, skin, eyes, mouth, or other mucous membranes under normal conditions of use and for the duration of time which the protective equipment will be used.

1910.1030(d)(3)(ii)

Use. The employer shall ensure that the employee uses appropriate personal protective equipment unless the employer shows that the employee temporarily and briefly declined to use personal protective equipment when, under rare and extraordinary circumstances, it was the employee's professional judgment that in the specific instance its use would have prevented the delivery of health care or public safety services or would have posed an increased hazard to the safety of the worker or co-worker. When the employee makes this judgement, the circumstances shall be investigated and documented in order to determine whether changes can be instituted to prevent such occurrences in the future.

1910.1030(d)(3)(iii)

Accessibility. The employer shall ensure that appropriate personal protective equipment in the appropriate sizes is readily accessible at the worksite or is issued to employees. Hypoallergenic gloves, glove liners, powderless

gloves, or other similar alternatives shall be readily accessible to those employees who are allergic to the gloves normally provided.

1910.1030(d)(3)(iv)

Cleaning, Laundering, and Disposal. The employer shall clean, launder, and dispose of personal protective equipment required by paragraphs (d) and (e) of this standard, at no cost to the employee.

..1910.1030(d)(3)(v)

1910.1030(d)(3)(v)

Repair and Replacement. The employer shall repair or replace personal protective equipment as needed to maintain its effectiveness, at no cost to the employee.

1910.1030(d)(3)(vi)

If a garment(s) is penetrated by blood or other potentially infectious materials, the garment(s) shall be removed immediately or as soon as feasible.

1910.1030(d)(3)(vii)

All personal protective equipment shall be removed prior to leaving the work area.

1910.1030(d)(3)(viii)

When personal protective equipment is removed it shall be placed in an appropriately designated area or container for storage, washing, decontamination or disposal.

1910.1030(d)(3)(ix)

Gloves. Gloves shall be worn when it can be reasonably anticipated that the employee may have hand contact with blood, other potentially infectious materials, mucous membranes, and non-intact skin; when performing vascular access procedures except as specified in paragraph (d)(3)(ix)(D); and when handling or touching contaminated items or surfaces.

1910.1030(d)(3)(ix)(A)

Disposable (single use) gloves such as surgical or examination gloves, shall be replaced as soon as practical when contaminated or as soon as feasible if they are torn, punctured, or when their ability to function as a barrier is compromised.

..1910.1030(d)(3)(ix)(B)

1910.1030(d)(3)(ix)(B)

Disposable (single use) gloves shall not be washed or decontaminated for re-use.

1910.1030(d)(3)(ix)(C)

Utility gloves may be decontaminated for re-use if the integrity of the glove is not compromised. However, they must be discarded if they are cracked, peeling, torn, punctured, or exhibit other signs of deterioration or when their ability to function as a barrier is compromised.

1910.1030(d)(3)(ix)(D)

If an employer in a volunteer blood donation center judges that routine gloving for all phlebotomies is not necessary then the employer shall:

1910.1030(d)(3)(ix)(D)(1)

Periodically reevaluate this policy;

1910.1030(d)(3)(ix)(D)(2)

Make gloves available to all employees who wish to use them for phlebotomy;

1910.1030(d)(3)(ix)(D)(3)

Not discourage the use of gloves for phlebotomy; and

1910.1030(d)(3)(ix)(D)(4)

Require that gloves be used for phlebotomy in the following circumstances:

1910.1030(d)(3)(ix)(D)(4)(i)

When the employee has cuts, scratches, or other breaks in his or her skin;

1910.1030(d)(3)(ix)(D)(4)(ii)

When the employee judges that hand contamination with blood may occur, for example, when performing phlebotomy on an uncooperative source individual; and

1910.1030(d)(3)(ix)(D)(4)(iii)

When the employee is receiving training in phlebotomy.

..1910.1030(d)(3)(x)

1910.1030(d)(3)(x)

Masks, Eye Protection, and Face Shields. Masks in combination with eye protection devices, such as goggles or glasses with solid side shields, or chin-length face shields, shall be worn whenever splashes, spray, spatter, or

droplets of blood or other potentially infectious materials may be generated and eye, nose, or mouth contamination can be reasonably anticipated.

1910.1030(d)(3)(xi)

Gowns, Aprons, and Other Protective Body Clothing. Appropriate protective clothing such as, but not limited to, gowns, aprons, lab coats, clinic jackets, or similar outer garments shall be worn in occupational exposure situations. The type and characteristics will depend upon the task and degree of exposure anticipated.

1910.1030(d)(3)(xii)

Surgical caps or hoods and/or shoe covers or boots shall be worn in instances when gross contamination can reasonably be anticipated (e.g., autopsies, orthopaedic surgery).

1910.1030(d)(4)

Housekeeping --

1910.1030(d)(4)(i)

General. Employers shall ensure that the worksite is maintained in a clean and sanitary condition. The employer shall determine and implement an appropriate written schedule for cleaning and method of decontamination based upon the location within the facility, type of surface to be cleaned, type of soil present, and tasks or procedures being performed in the area.

1910.1030(d)(4)(ii)

All equipment and environmental and working surfaces shall be cleaned and decontaminated after contact with blood or other potentially infectious materials.

..1910.1030(d)(4)(ii)(A)

1910.1030(d)(4)(ii)(A)

Contaminated work surfaces shall be decontaminated with an appropriate disinfectant after completion of procedures; immediately or as soon as feasible when surfaces are overtly contaminated or after any spill of blood or other potentially infectious materials; and at the end of the work shift if the surface may have become contaminated since the last cleaning.

1910.1030(d)(4)(ii)(B)

Protective coverings, such as plastic wrap, aluminum foil, or imperviously-backed absorbent paper used to cover equipment and environmental surfaces, shall be removed and replaced as soon as feasible when they become overtly contaminated or at the end of the workshift if they may have become contaminated during the shift.

1910.1030(d)(4)(ii)(C)

All bins, pails, cans, and similar receptacles intended for reuse which have a reasonable likelihood for becoming contaminated with blood or other potentially infectious materials shall be inspected and decontaminated on a regularly scheduled basis and cleaned and decontaminated immediately or as soon as feasible upon visible contamination.

1910.1030(d)(4)(ii)(D)

Broken glassware which may be contaminated shall not be picked up directly with the hands. It shall be cleaned up using mechanical means, such as a brush and dust pan, tongs, or forceps.

1910.1030(d)(4)(ii)(E)

Reusable sharps that are contaminated with blood or other potentially infectious materials shall not be stored or processed in a manner that requires employees to reach by hand into the containers where these sharps have been placed.

1910.1030(d)(4)(iii)

Regulated Waste --

..1910.1030(d)(4)(iii)(A)

1910.1030(d)(4)(iii)(A)

1910.1030(d)(4)(iii)(A)(2)(iii)

Replaced routinely and not be allowed to overfill.

1910.1030(d)(4)(iii)(A)(3)

When moving containers of contaminated sharps from the area of use, the containers shall be:

1910.1030(d)(4)(iii)(A)(3)(i)

Closed immediately prior to removal or replacement to prevent spillage or protrusion of contents during handling, storage, transport, or shipping;

1910.1030(d)(4)(iii)(A)(3)(ii)

Contaminated laundry shall be handled as little as possible with a minimum of agitation.

1910.1030(d)(4)(iv)(A)(1)

Contaminated laundry shall be bagged or containerized at the location where it was used and shall not be sorted or rinsed in the location of use.

1910.1030(d)(4)(iv)(A)(2)

Contaminated laundry shall be placed and transported in bags or containers labeled or color-coded in accordance with paragraph (g)(1)(i) of this standard. When a facility utilizes Universal Precautions in the handling of all soiled laundry, alternative labeling or color-coding is sufficient if it permits all employees to recognize the containers as requiring compliance with Universal Precautions.

1910.1030(d)(4)(iv)(A)(3)

Whenever contaminated laundry is wet and presents a reasonable likelihood of soak-through of or leakage from the bag or container, the laundry shall be placed and transported in bags or containers which prevent soak-through and/or leakage of fluids to the exterior.

1910.1030(d)(4)(iv)(B)

The employer shall ensure that employees who have contact with contaminated laundry wear protective gloves and other appropriate personal protective equipment.

..1910.1030(d)(4)(iv)(C)

1910.1030(d)(4)(iv)(C)

When a facility ships contaminated laundry off-site to a second facility which does not utilize Universal Precautions in the handling of all laundry, the facility generating the contaminated laundry must place such laundry in bags or containers which are labeled or color-coded in accordance with paragraph (g)(1)(i).

1910.1030(e)

HIV and HBV Research Laboratories and Production Facilities.

1910.1030(e)(1)

This paragraph applies to research laboratories and production facilities engaged in the culture, production, concentration, experimentation, and manipulation of HIV and HBV. It does not apply to clinical or diagnostic laboratories engaged solely in the analysis of blood, tissues, or organs. These requirements apply in addition to the other requirements of the standard.

1910.1030(e)(2)

Research laboratories and production facilities shall meet the following criteria:

1910.1030(e)(2)(i)
